| Diag refer moving out of cabinet found bottom bracket bolts loose and came out of hole set also had loosened wall. I replaced bolt and set back into bracket refer still moving around top much for travel so I gave them a strap and showed how to secure. There is no access to rear of refer and that needs to be secure. Also you can tell brackets have been moved once before. Took Pic | 1 | \$120.00 | \$120.00 |
