Hi

i am here from 01AM EST to 12:00 midday EST

Domain Help desk

<http://algotradingsystems.zendesk.com/>

We need a chart widget for website
and talk which i believe will allow incoming phone numbers and outbound dialler.

I was under the impression to get chat and talk i had to upgrade to Team, So i did this.

Yes i believe i upgraded last night but the invoicing says february so i'm not sur what is happening there.

But it seems i'ver made a huge mess. Zendesk thinks the sub is from Feb not march and then instead of going monthly as i wanted i was charged annually... so i messed that up and we still got no talk 😊

we got chat:
